ABSTRACT

This booklet summarizes the 1972-73 annual reports of member institutions to the National Association of Schools of Music (NASM). Of the 398 institutional members of NASM in 1972-73, 355 (90%) submitted annual reports. Statistical data are presented for enrollments and degrees awarded in the undergraduate, master's, post-master's (nondoctoral) and doctoral level; operational expenditures; faculty; ratios for music majors per faculty member, faculty salary per music major, music majors per practice room; administration; and new music facilities. (MJM)

PREFACE

This booklet is the seventh in a series of informative publications from the National Association of Schools of Music. The statistical information contained herein is based on the 1972-73 annual reports of member institutions to the Association. Of the 398 institutional members of NASM in 1972-73, 355 (90%) submitted annual reports.

Every effort has been made to preserve the confidentiality of institutional annual reports. Statistical information is reported by support (private or tax-supported) and size (number of music major students) of institutions or, in some cases, by highest degree level offered. The number of institutions reporting the various types of information varies because some reports were incomplete. Data from two-year colleges were included where appropriate and where the number of reports from two-year colleges was sufficient to provide valid statistics.

Information from NASM annual reports is preserved in a data base for immediate access. The NASM Washington office can prepare special reports upon request and member institutions are encouraged to avail themselves of this service. Institutional reports are categorized in the data base by the following:

a) type of institution (two-year college, independent school of music, theological seminary, college/university)

b) highest degree level offered (associate, baccalaureate, masters, doctorate)

c) type of support (private or tax-supported)

d) music major enrollment

e) total enrollment of institution

f) region of the country

Any one or any combination of these categories may be specified when requesting special reports.

This publication, *Music In Higher Education: 1972-73*, is a continuing project. It is our hope that the members of the National Association of Schools of Music will be generous in sending suggestions for modifications or additions in future editions.

Processing of the data for this publication was accomplished by means of the Kronos Time-Sharing Service, System 2000, of the Control Data Corporation.

Robert Glidden
Executive Secretary

of Music

ENROLLMENTS AND DEGREES AWARDED

In reporting student enrollment and degrees awarded in specific undergraduate degree programs, the labels *BM*, *BME*, and *BA*, were used in the interest of brevity. The following definitions apply:

BM	Pre-professional undergraduate music majors (curricula with approximately 2/3 music) *Music education majors are excluded from this category.*
BME	All undergraduate music education majors (curricula leading to music teaching certificate)
BA	Undergraduate liberal arts music majors (curricula with approximately 1/3 music)

In reporting statistics for masters degrees, music education and music therapy have been combined into one category, all other areas comprising the second category under the label *non-MuEd*.

Doctoral degree programs are defined as follows:

DMA	Music practice (performance, composition, church music)
MuEd	Music education and music therapy
Ph.D.	Musicology, music therapy

FACULTY SALARIES

In reporting faculty salaries member institutions were asked to indicate the lowest and highest salaries, and the total salaries for each rank. Average salaries were computed at the Washington office. The lowest reported low salary and the highest reported high salary represent the total range of salaries for a specific rank within a given size and type category. The best overall indicators are the 50th percentile and the average salary for any given rank.

All faculty salaries were reported on a nine-month basis and exclusive of fringe benefits.

Size categories for this section are determined by total enrollment in all music degree programs, graduate and undergraduate.

FACULTY TEACHING LOADS

Statistics for faculty teaching loads were compiled in the following manner:

(a) Respondents were asked to provide figures that *would* represent a full-time load for faculty members employed for any one duty. Thus, figures received reflected hypothetical as well as actual loads.

(b) Full loads were to be expressed as appropriate for the reporting institution in terms of credit hours, clock hours, and/or number of students.

(c) If faculty members were expected to perform a given function but load credit was not granted for such activity, *No Credit Allowed* was to be indicated.

(d) If faculty members were *not* expected to perform given functions, *Not Applicable* was to be indicated.

The most frequently occurring full load criteria are tabulated in the *Equal to Full Load* columns. *Other Criteria* bases for full load computation are expressed as a percentage of the number reporting.
